

## **Never Seen Success at the 3<sup>rd</sup> Edition of RENEXPO<sup>®</sup> South-East Europe Renewable Energies were Present at the Palace Hall Bucharest with the Biggest Event in Romania**

The Palace Hall Bucharest hosted between the 24.-26.11.2010, the biggest renewable energy and energy efficiency trade fair, RENEXPO<sup>®</sup> South-East Europe. The event showed how simple and environmental friendly the future energy supply can become and created in the same time the biggest meeting point from Romania in this field.

„Over 3000 specialized visitors demonstrate the high interest for renewable energy in Romania. 71 exhibitors from 11 European countries were happy to take part at the three successful days of the event that contributed not only to the market development but also to successful businesses. We would like to thank to all our partners, sponsors, exhibitors and the Environmental and Forest Minister, Borbely Laszlo who came and contributed to the success of this event!” declares Avena Gall-Tamas, manager REECO RO Expoziții S.R.L., about RENEXPO<sup>®</sup> South-East Europe 2010.

Between the trade fair themes there were: wind energy, bioenergy, biogas, energy efficiency, hydropower, geothermal energy, solar energy, and passive house. Over 20 exhibitors from wind energy sector showed their products and services in the **Wind Park**, a special trade fair area. The biggest companies like: ENERCON, GAMESA, Global Wind Power, PNE Wind Romania SRL, Wind Power Energy, Wind Turbine Service Romania, WKA Montage GmbH, Energobit participated at the trade fair.

The trade fair was opened by State Secretary for Forests, Cristian APOSTOL, from Environment and Forest Ministry of Romania, Daniela GIURCĂ, General Director, General Direction of Agriculture Policies, Ministry of Agriculture and Rural Development in Romania, Johann Georg Röhme, General Director REECO Group and Avena Gall-Tamas, project manager.

The five conferences and the workshop that took place in parallel to the trade fair, attracted over 550 participants from Romania, Belgium, Germany, Austria, Italy, Hungary, Spain and England.

Press release 29.11.2010

The **3rd International Conference - Wind Energy in Romania** created the largest meeting point in this area, where in addition to key persons in Romania: Laszlo BORBELY- Minister of Environment and Forests, Alexandru SĂNDULESCU - Director Energy Policies in the Ministry of Economy, Commerce and Business Environment, Romania and many others. The event was also attended by international well-known companies such as Gamesa, Nordex, Vestas, Global Wind Power, Alstom and Siemens.

At the **2nd International Conference - Solar Energy in Romania**, ESTIF - European Solar Thermal Industry Federation, will organize a workshop on QAI<sup>ST</sup>, a project which aims to provide quality technology for solar heating and cooling.

The event informed experts about the latest news in their field but tried to educate the end consumers through promoting solar toys and universities that do research in the field of renewable energy.

To give continuity to this event, the REECO group will organize in spring next year the third edition of ENREG ENERGIA REGENERABILĂ®, 7.-9.04.2011, that will take place in Arad, thereafter coming back with 4<sup>th</sup> edition of RENEXPO® South-East Europe.
