

Small Hydropower in Romania

RENEXPO® SOUTH-EAST EUROPE 2011
9th – 11th November 2011, Palace Hall Bucharest

The EBRD is continuing to support the development of the renewable energy field in Romania, where especially the hydropower market is highly developed. The international and national experts meet in order to exchange know-how, present experiences from the practice and offer advice gained through research and development at the 4th International Conference: Small Hydropower Plants in Romania, on the 10th November 2011, in Palace Hall Bucharest.

The EBRD is continuing to support the implementation of Romania's ambitious renewable energy generation programme with a major investment to modernise the country's oldest hydro power plant. (According to www.ebrd.com)

Romania is also part of **THE SHPSTREAMMAP project**, the ESHA-led new European project in the framework of the European Commission, EACI, IEE - The Intelligent Energy - Europe program, described as the EU's tool for the funding actions in the energy field.

The objective of the project is to define a clear and a consistent Road Map for the SHP sector, applicable to the current prospects of the ongoing EU Energy and Climate Change Packet regulations based on the real situation of the SHP sector at present. In order to reach this goal it is strictly necessary to define a unique source of information on reliable SHP data.

One of ESHA partners in this project is: Institute of Hydroelectric Studies and Design — IHSD: for Romania. The Romanian National Association ROSHA is a member of ESHA since 2008. The ROSHA represents the Romanian small hydropower sector at the European Commission.

Also ROSHA, together with the international trade fair and conference organiser, REECO, organizes in the framework of the **4th International Conference - Small Hydropower in Romania**, on the **10th November 2011**, in the **Palace Hall Bucharest** a workshop in the European SHP-STREAMMAP Project, co-financed by IEE.

The event will take place in the framework of Romania's biggest renewable energy fair **RENEXPO® SOUTH-EAST EUROPE** in Palace Hall Bucharest, 9th-11th November 2011. At this year's event small hydropower plays an important role in the trade fair as well as in the conferences. International and national companies like Global Hydro Energy GmbH, WWS Wasserkraft GmbH & Co KG, VAPTECH Ltd., CINK Hydro-Energy, GUGLER Water Turbines GmbH, Voith Hydro SRL and others will participate.
