RES in Big Buildings - 1st International Conference in Romania

Renewable energy usage will have a sustainable success in the future only if it succeeds in bringing economic, environmental and quality targets in the line. The big buildings such as hospitals, schools, office buildings, hotels have to show an example in this respect. RENEXPO® SOUTH-EAST EUROPE, the 4th renewable energy trade fair of Romania and South-East Europe, will bring together experts and key persons from the renewable energy field to a central event, during 9th - 11th November 2011, at the Palace Hall in Bucharest.

The European Union Policy leads us to consider the use of energy produced by renewable energy sources. This guideline aims to reduce dependence on limited fossil fuels, energy supply at affordable prices by consumers, especially households and also environment protection by reducing emissions of greenhouse gases. The current energy crisis is in fact a crisis of knowledge and compels us to search new solutions.

Considered at first as too expensive and inefficient, it was demonstrated that while the cost decreases and performance is growing with the improvement and expansion of production technologies and implementation.

The **1st International Conference - RES in Big Buildings in Romania** invites you on the **09th of November 2011**, to the **Palace Hall Bucharest** to presentations and debates about solutions that have proved to be the future for small consumer markets of electrical and thermal energy: equipments that uses renewable sources like: solar energy, wind energy, geothermal energy, biomass or biogas.

The event organised by AAEC - Association of Energy Auditors in Buildings in collaboration with REECO will present the concept of active house, house that produce more than consumes, also "smart grids" management system type of energy supplied from renewable resources, local or for a building block, with management systems of "intelligent" consumed energy inside the buildings.

1st International Conference - RES in Big Buildings in Romania will take place in the framework of the 4th energy trade fair of Romania, **RENEXPO® SOUTH - EAST EUROPE** where over 80 companies will exhibit for 3 days their products, during **9-11 November 2011**.

Further information about the biggest renewable energy event of Romania and South-East Europe, RENEXPO® SOUTH-EAST EUROPE and about the *1st International Conference - RES in Big Buildings in Romania* you can find under www.renexpo-bucharest.com.
